

## **PACTO<sup>®</sup>** - Toilet System

- The Pacto Toilet System has a wide range of usage areas, thanks to the simple design that does not require electricity, water or sewerage.
- Instead a flush foil is used encapsulating the waste preventing any direct contact with the waste. This makes the toilet easy to maintain, hygienic and fresh at every use.
- The environmentally friendly flush foil is made from polythene and leaves only carbon dioxide and water when incinerated.

## Pacto Toilet

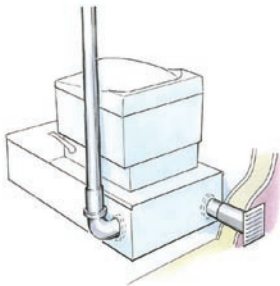

Developed more than 30 years ago, the Pacto toilet is a well tested and reliable system. A pedal fed flush foil is used, to ensure clean foil in the toilet bowl every time and prevent unpleasant sights or smells for the user.

When delivered, the toilet is folded to simplify transportation, but a few simple moves are enough to assemble it.

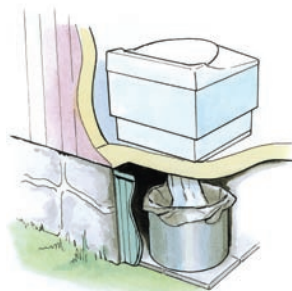

## Two ways to install the Pacto Toilet

- 1) Standing on a podium that contains the collecting bags. In this case it is important to complement the installation with a flow through-air ventilation.
- 2) Place the collecting bags in a box underneath the floor. This means emptying the flush foil from outside.

Installation 2

How to remove the waste from the Podium.

## Polythene Flush Foil

The flush foil used with the Pacto Toilet system is made of polythene. It is very tough to ensure it does not burst during transportation of the waste.

The foil is environmentally friendly and can be incinerated after use, leaving only carbon dioxide and water.

Flush foil for the Pacto toilet:

- 1 box gives approx. 1500 flushes
- 1 box of flush foil contains 15 collecting bags and 5 cassettes
- 1 box gives approx. 1500 flushes

## Accessories

- Podium
- Polythene flush foil
- Polythene collecting bag
- Collecting box

## Dimension and weight

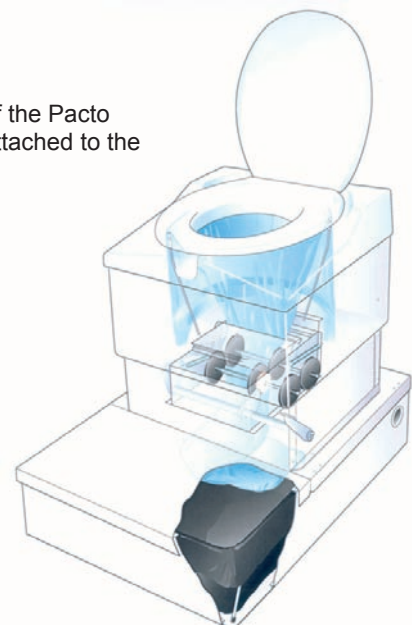

### Pacto toilet

Depth: 484 mm  
Width: 483 mm  
Height: 415 mm  
Weight: 16 kg

### Podium

Depth: 817 mm  
Width: 560 mm  
Height: 219 mm  
Weight: 20 kg

A cross-section of the Pacto Toilet when it is attached to the Podium.
